

Databricks Terms of Use - Kimi/Moonshot Models

In this page, learn about terms applicable to you and your Authorized Users' use of the Kimi Models (proprietary models developed by Moonshot and made available as a first party offering on Databricks). You are responsible for complying with these terms when using Moonshot models offered through Databricks.

Customer and Customer's Authorized Users shall not, and shall not authorize any third party to:

1. use the Kimi Models, any derivatives thereof, or any output thereof to build, train, distill, develop, or improve any product, service, foundation model, or general-purpose AI system that competes with the Kimi Models; or
2. remove, alter, or obscure any proprietary notices, licenses, or attribution in or on the Kimi Models, any derivatives thereof, or any associated model materials (including model cards, system cards, and documentation provided in connection with the Kimi Models) ("Model Materials").

Disclaimer. The Kimi Models may generate output that is inaccurate, incomplete, or offensive. The Kimi Models are not intended to satisfy Customer's and Customer's Authorized Users' regulatory, legal, or other compliance obligations. The same or similar output may be generated for multiple customers.

Suspension. Databricks may immediately suspend or terminate Customer's or Customer's Authorized Users' access to the Kimi Models if Databricks reasonably suspects that Customer's and Customer's Authorized Users' use violates these Kimi Model Terms, the Agreement, or applicable documentation.
